Professional Summary

Software Engineer with 3+ years of experience building scalable backend systems at Zoho. Experienced in Java, MySQL, REST APIs and distributed architectures. Owned multiple modules of Zoho Practice and led migration from a monolithic codebase to an independent service while ensuring production stability.

Experience

Member Technical Staff

Zoho | Chennai

Jan 2023 – Present (Jan '23 - Jul '23 Intern)

- Part of the Enterprise Accounting Software (Zoho ERP, Zoho Books) Banking and Accountant module Backend Developer.
- Developed and enhanced Practice Management platform (Zoho Practice), features used by accounting firms and enterprise customers.
- Represented Zoho Practice in a cross-functional 3-member team that onboarded 300+ accountants and 2,000+ clients from ClearTax to Zoho Books and Zoho Practice following ClearTax's product sunset, ensuring seamless migration and adoption.
- Owned the Zoho Practice side of the migration for Auroville's accounting firm, acting as the product expert and technical decision-maker to enable the onboarding of 750+ clients onto Zoho Practice and Zoho Books.
- Led the live migration and repository isolation of Zoho Practice from the monolithic Finance Suite into an independent codebase, while also extracting shared services into dedicated repositories and ensuring zero production downtime.
- Enhanced banking auto-feed workflows and accounting rule systems for enterprise accounting modules, improving reliability and reducing production issue frequency.
- Own and drive the backend architecture and core infrastructure of Zoho Practice, focusing on code organization, module design, and maintainability.
- Designed and owned backend modules including Task Reminder, Workpaper, Client Insights, Timesheets, and Filing & Compliance for Zoho Practice.
- Delivered key features including Task Reminders, Timesheets with Billing, Workpapers, Insights Builder, Practice Monetization & Subscription, HMRC Agent Authorization, Notice AI Integration, etc.
- Optimized critical MySQL queries, reducing response latency by 30% and improving performance of core workflows.

Education

B.TECH MECHANICAL ENGINEERING | 2023 | SASTRA UNIVERSITY, THANJAVUR

- 8.53 CGPA *Honors

Additional qualifications

- Full Stack Developer App Development (Flutter) and Backend in Website (Django stack)
- Working with Python, from University of Michigan via Coursera
- Working with Database in Python, from University of Michigan via Coursera
- Artificial Intelligence Search methods and Problem Solving, from NPTEL
- Developing Soft Skills and Personality, from NPTEL

- Soft Skills and Development, from NPTEL
- Fuzzy Sets, Logic and Systems & Applications, from NPTEL

Skills and Languages known

Languages

Java Python C++ SQL TypeScript JavaScript

Backend

JAX RS SpringBoot REST APIs Gradle Microservices NodeJS

DataBase

MySQL Query Optimizing Indexing MongoDB

FrontEnd

ReactJS HTML CSS Flutter

Tools

GIT Detective (Internal Test cases recording and testing model)

Concepts

System Design Distributed Systems Backend Architecture

Projects & Achievements

- Created a Mobile App for the Matrimonial company (Mangala Sangamam) using Flutter. Now with 300+ users (Own Interest)
- Other own interest projects involving realtime use cases or needs are available in [github link](#)
